Spit Spreads Death: What can a bedpan tell us about a pandemic? Jane E. Boyd, Ph.D., is an independent curator and writer based in Philadelphia. L'influenza spagnola, altrimenti conosciuta come la grande influenza o epidemia spagnola, fu una pandemia influenzale, insolitamente mortale, che fra il 1918 e il 1920 uccise decine di milioni di persone nel mondo, la prima delle due pandemie che coinvolgono il virus dell'influenza H1N1. Essa arrivò ad infettare circa 500 milioni di persone in ... The second wave of the 1918 pandemic was much deadlier than the first. The first wave had resembled typical flu epidemics; those most at risk were the sick and elderly, while younger, healthier people recovered easily.
