

Download Chemistry Mole Problems And Answers

The mole is a standard SI unit used primarily by chemistry. This is a collection of ten chemistry test questions dealing with the mole. Our chemistry teacher didn't teach us how to do this properly, so if you have an explanation, I'd be grateful. We only learned one-step...these don't seem to be one-step. 2 kg of CaCO₃ (limestone) contains how many moles of CaCO₃? (Answer in moles) A 13 g sample of P₄O₁₀ contains how many molecules of phosphorus ...Best Answer: N₂+3H₂---->2NH₃ How many moles of hydrogen are needed to completely react with two moles of nitrogen? For this one, you multiply the whole equation by 2 to get 2 moles of nitrogen on the reactants side, which will help you solve your problem.
