

Download Consultations In Feline Internal Medicine

Feline Seizures and Epilepsy Written by: Bruce Lowekamp . The intent of this page is to provide information for people whose cats have had seizures. Occasional vomiting can be perfectly normal in a cat. However, if it's out of character for your cat to vomit, the frequency of vomiting increases, or the cat loses weight or seems unwell, then veterinary attention should be sought. -??? ?? ??- 1. ????: ?? ???/bc/??/?/kb??/nh??/???? (??, ??, ??, ????? ??) 2. Feline Tooth Resorption (TR) is a syndrome in cats characterized by resorption of the tooth by odontoclasts, cells similar to osteoclasts. TR has also been called "feline odontoclastic resorption lesion" (FORL), neck lesion, cervical neck lesion, cervical line erosion, feline subgingival resorptive lesion, feline caries, or feline cavity., Consultations In Feline Internal Medicine.
